

# Netto Icons

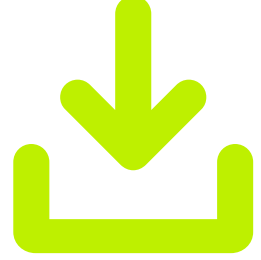

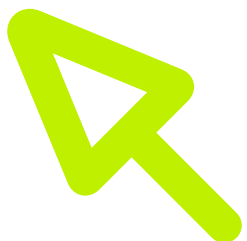

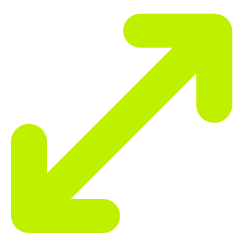

# Operating Manual

The Netto icons are designed to perfectly match the text fonts. The stroke width of the icons ranges from thin to black, which makes them combinable with with all font styles.

All icons are based on a square grid. Size and proportions were adapted to the text fonts. Unlike the letters, the icons have a uniform width - they are "monospaced".

You can  download stuff,  
use the  search,  
 interact or  resize things.

**You can  download stuff,  
use the  search,  
 interact or  resize things.**

Netto icons are based on the Unicode Standard. This particular standard defines uniform numbers, code points, for all characters, whether they are letters, icons or emojis:

Latin Capital Letter A = 0041  
 ☺ = Smiling Face = 263A

The icons can't be accessed via keyboard, but must be selected from the Glyphs palette. Even easier: find and copy them from the overview on [TypeMates.com](https://TypeMates.com)

The overview shows all glyphs that can be accessed directly via keyboard: basic geometric shapes, frames and outline elements, etc.

Toggling between upper and lower case can be used to change from filled to non-filled versions.

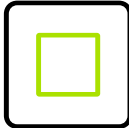

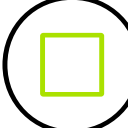

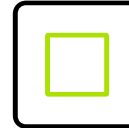

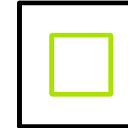

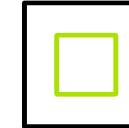

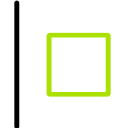

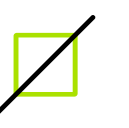

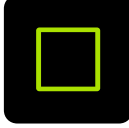

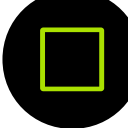

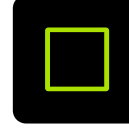

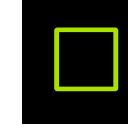

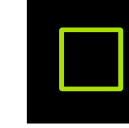

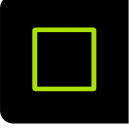

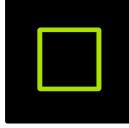

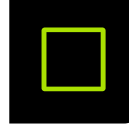

Icon width: 1440  
Space width: 720  
Frames and divider width: 216

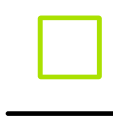

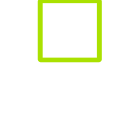

Arrows											
	1	2	3	4	6	7	8	9			
Basic Forms: Outline											
	a	b	c	d	e	f	g	h	k	l	m
Basic Forms: Filled											
	A	B	C	D	E	F	G	H	K	L	M
Frame Elements: Outline											
	p	q	r	s	t	u	v				
Frame Elements: Filled											
	P	Q	R	S	T	U	V				
Dividers											
	x	y	/	!	-	-					
Div											
	-	1									
Spacers											
	space	+									

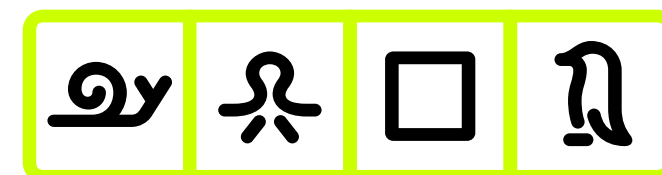

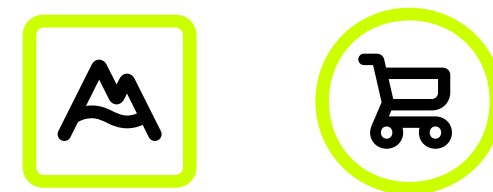

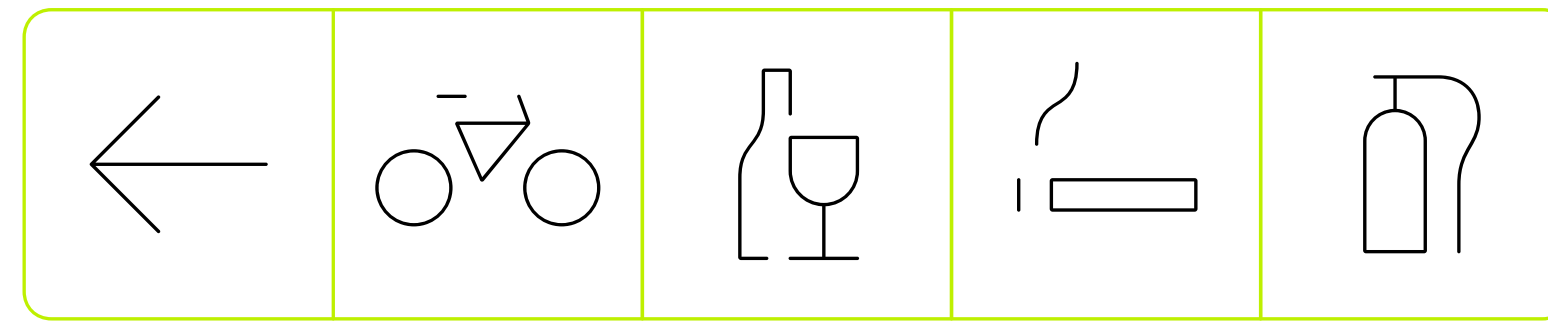

The border elements offer countless options for different pictograms to be grouped in various ways.

The borders can be accessed directly via the letters on the keyboard; also in combination with the icons. However, the order of typing is important: first the frame element, then the icon. That way it is possible to use the icons on filled backgrounds. By changing from lowercase to uppercase, you can switch between non-filled and filled frame elements.

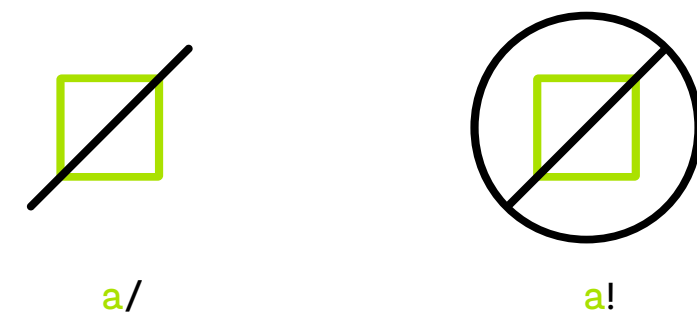

Most of the time you do not need border elements. Dividers will do the job.

Square	Circle	Frame with dividers			Frame without dividers			Dividers	Prohibited		
											
pa	qa	ra	sa	ta	ra	ua	va	xa	ya	a/	a!
											
Pa	Qa	Ra	Sa	Ta	Ra	Ua	Va				

			ya	
rasasata	RaSaSaSaTa	xaxaxax	ya	
			ya	
rauauava	RaUaUaUaVa		ya	

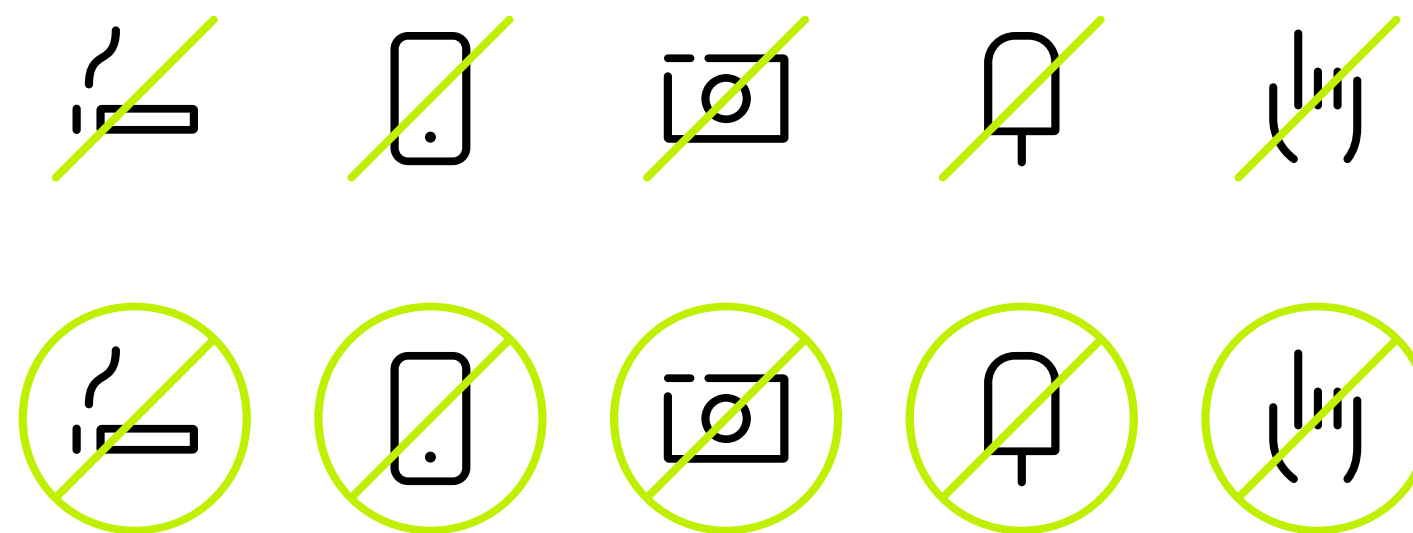

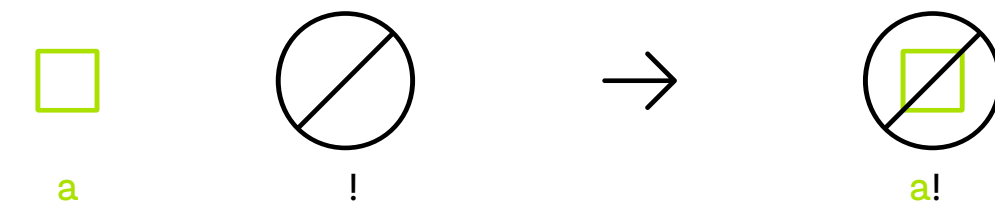

Differently to the frame elements, the two prohibitive signs are typed after the icons. That way they overlay the icons and can be coloured if needed.

Frames are typed before the icons.

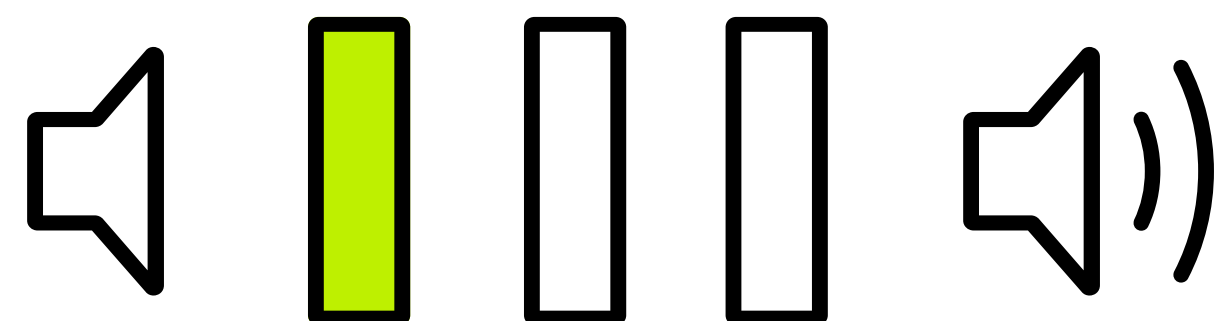

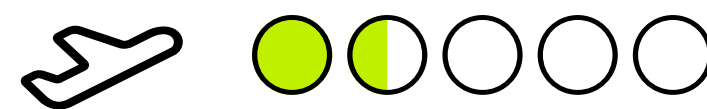

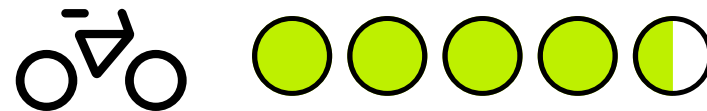

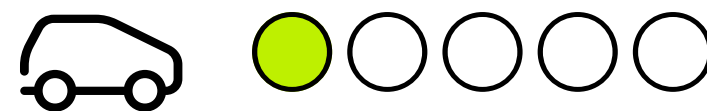

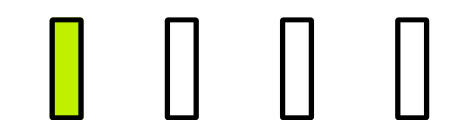

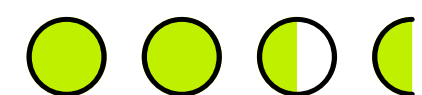

Prohibited and prohibitedCircle are typed after the icons, so the prohibition signs are displayed on the foreground.

Simple infographics or status displays can be created from basic geometric shapes. To do so, simply place two text blocks on top of each other. Just switch between uppercase and lowercase letters to combine filled and unfilled forms. Border elements can also do the job.

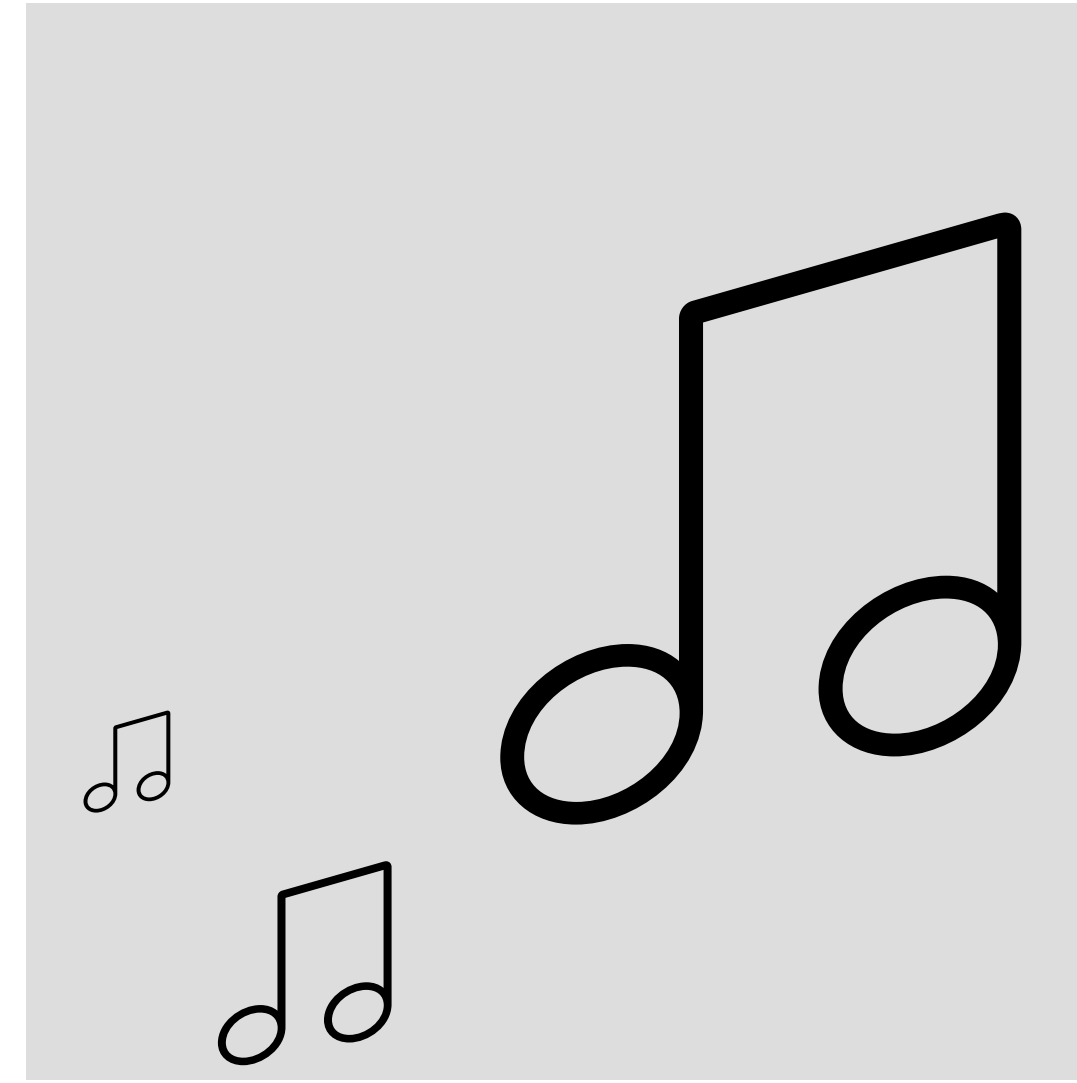

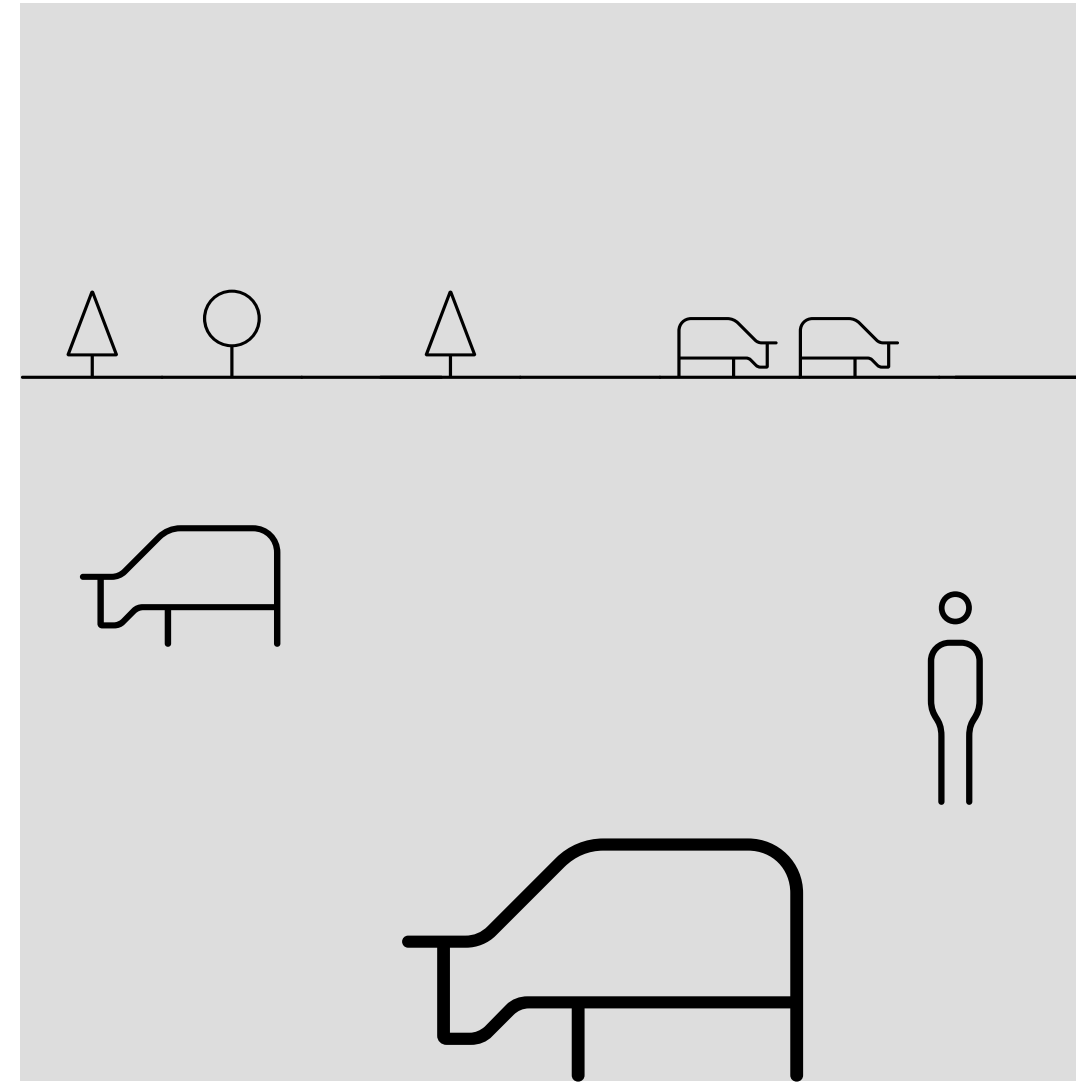

A - H Whole shapes  
K - M Half shapes

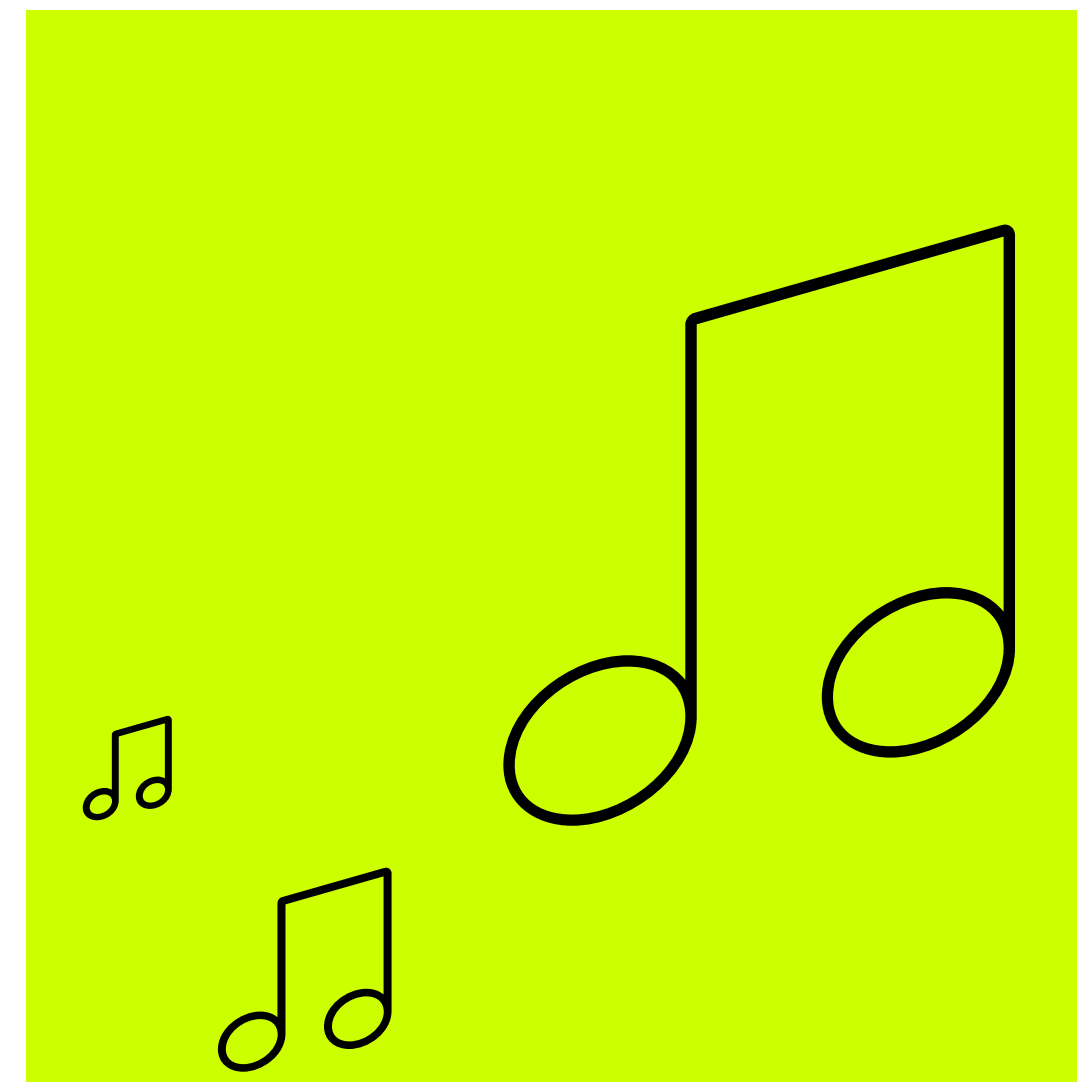

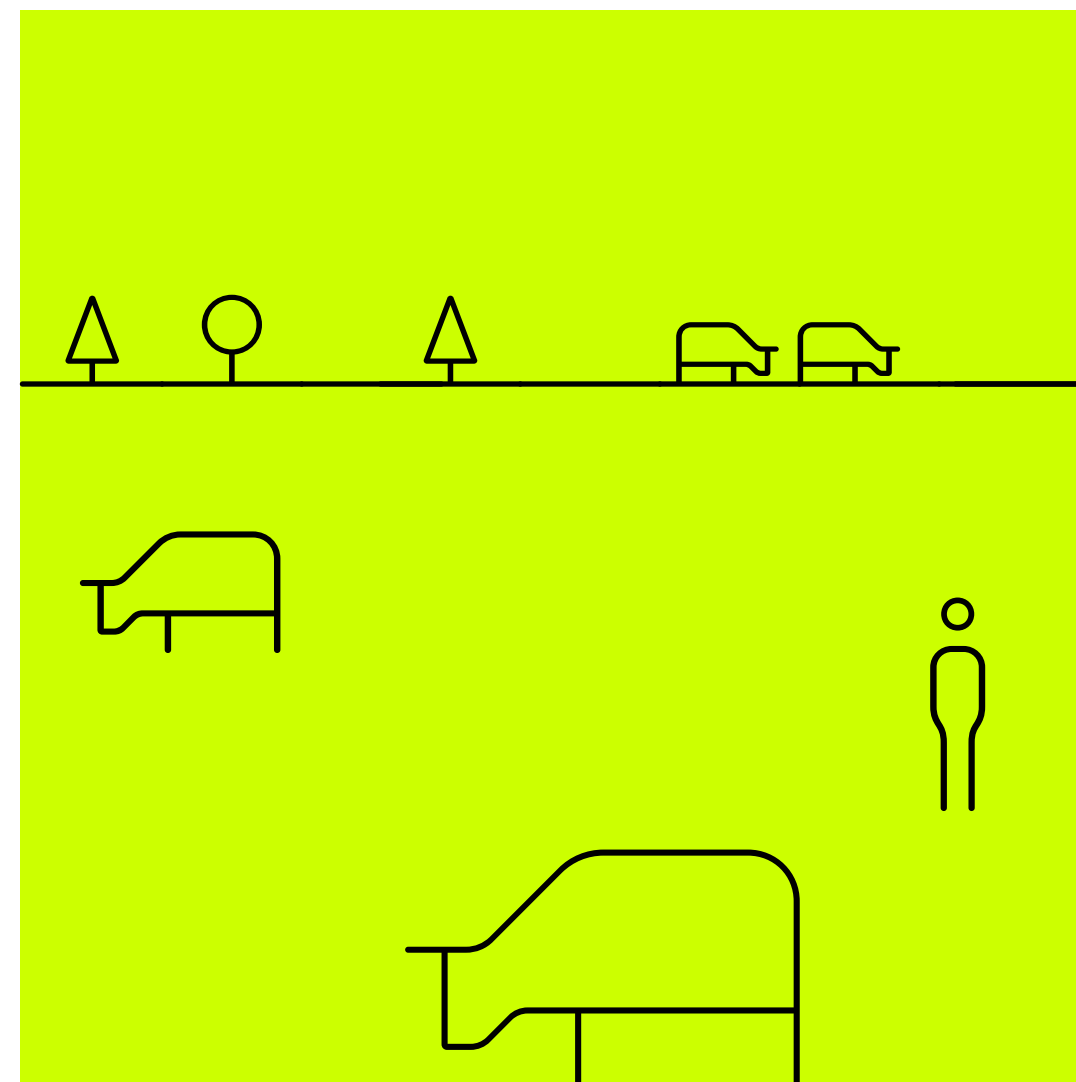

When icons are used in different sizes, the stroke width can be unified by using the weight axis.

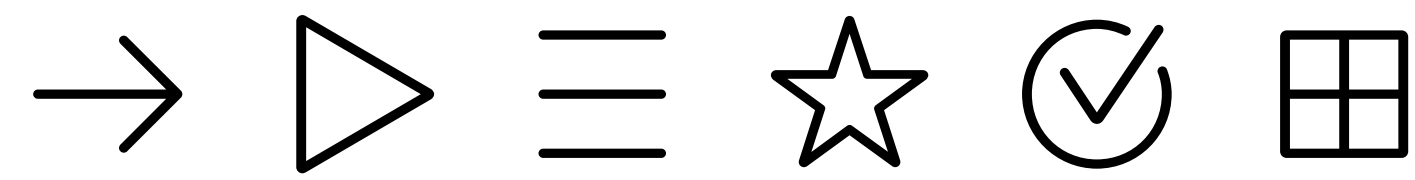

Regular weight in different sizes

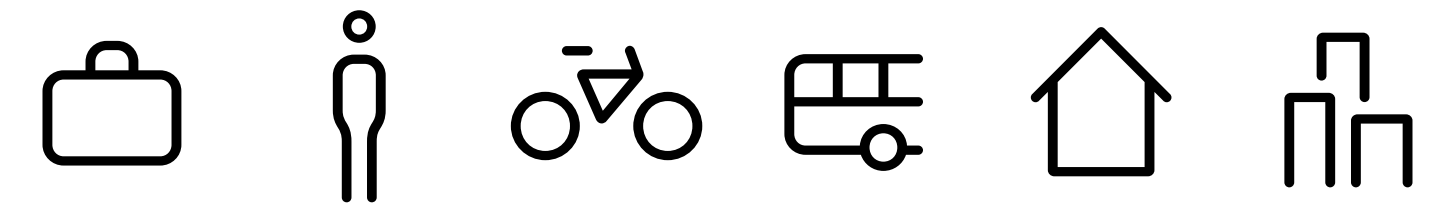

Adjusted line width

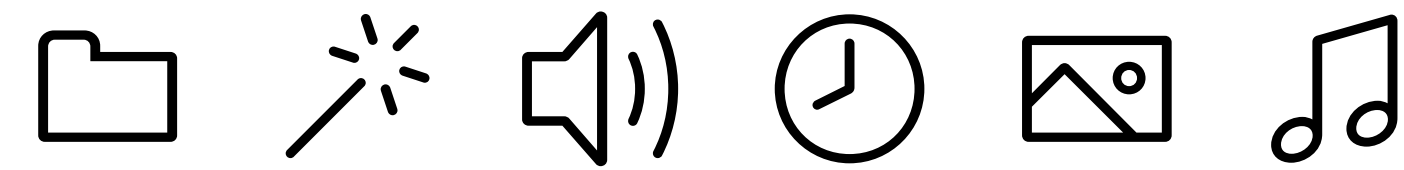

arrows, basic forms

signage, transport, maps

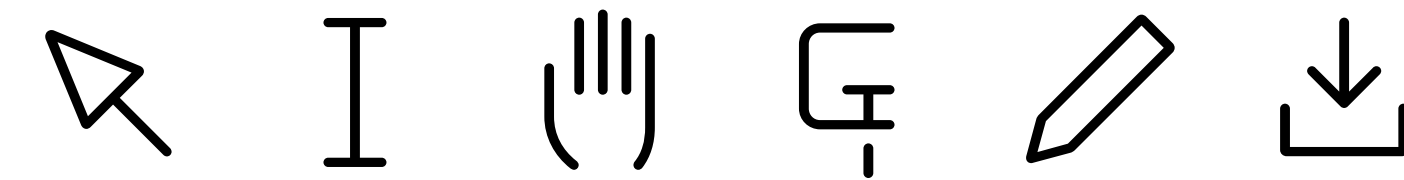

interface, media

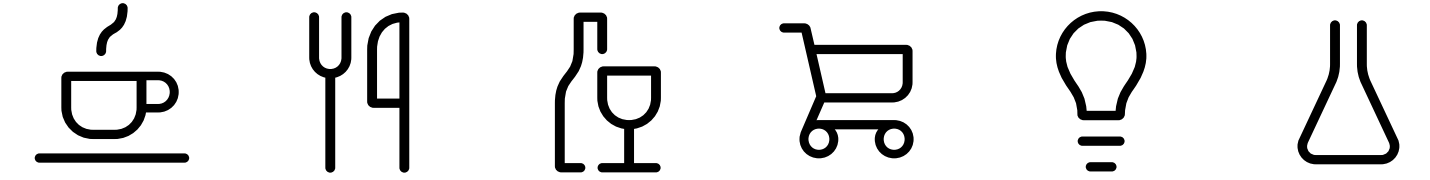

weather, security

input, actions

food, objects

hardware, office

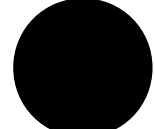

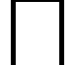

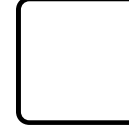

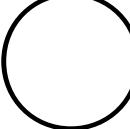

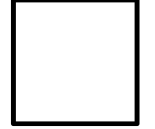

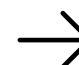

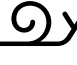

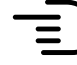

animals, plants

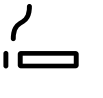

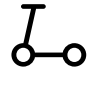

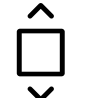

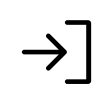

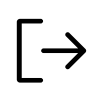

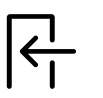

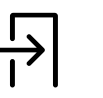

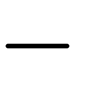

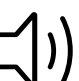

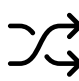

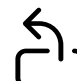

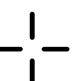

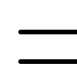

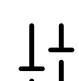

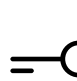

To get the smartest order of Netto Icons, teach your design apps to sort the font by CID/GID, not by Unicode.

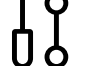

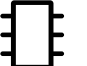

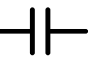

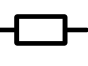

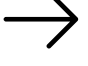

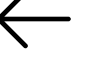

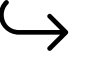

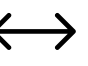

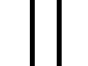

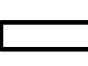

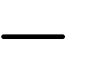

In Adobe InDesign follow these steps:

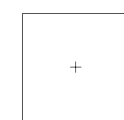

1. go to the glyphs tab
2. click on the menu in the upper right
3. go to "sort glyphs"
4. choose "CID/GID"
